TODD'S CATALOGUE

OF

High Grade Strawberry Plants at Reasonable Prices

Stark Co., Ohio,
Jan. 21st, 1920.

W. S. TODD,
Greenwood,
Delaware.

Dear Sir:

Your catalogue of strawberry plants received today and I am forwarding my order for plants by return mail as I do not want to be disappointed as I was last year. You were sold out of the varieties I wanted when I sent my order, and I was so disappointed that I am not over it yet. I have bought plants of you for more than twenty years and have recommended you to many people.

Yours truly,

J. O. STUMP.

FROM

W. S. TODD

GREENWOOD, - DELAWARE

1921

1921—GREETINGS—1921

Again it is my pleasure to present to the public my annual strawberry plant catalogue. I wish first of all to thank my customers for their liberal patronage of past seasons. Many have dealt with me from the first, when I sent out my four-page circular and it is useless for me to say that had I not dealt with them fairly, and sent out only first-class plants, I would not now be favored with their patronage. The past season here has been favorable for plant growth and I have a good supply of plants, all grown on light soil especially prepared for this purpose, and they are extra large, with a heavy mass of fibrous roots and will surely please all purchasers. In asking for your patronage for this season I advise all to place their orders early and have the plants shipped just as early as you can possibly handle them. We send out nothing but first-class plants, trim and pack them as they should be, and I assure you that you will receive the same liberal treatment, and plants of the same high-grade as in seasons past, and that you cannot buy better plants, or plants that will produce more or better fruit, no matter what you pay, or where you get them.

Again, thanking you for your liberal patronage of seasons past, and wishing you a prosperous season, I remain,

Faithfully yours,

SPECIAL NOTICE.

I guarantee all plants sent by mail or express to reach you in good condition when taken from the office promptly and opened at once and rarely ever have a complaint. We always mail each customer a written, sealed notice the day plants are shipped, giving the date and number of packages in each shipment. In case plants are unduly delayed in transit examine them before you take them from the express office and in case they are damaged either refuse them, or have your agent make notation of damage on your express bill before you accept them. Please remember that unless this is done we cannot collect damages from the express company and that we will not be responsible for such claims unless this request is complied with. Last season we had a number of orders delayed and spoiled in transit, caused by the strike, and which was no fault of ours; some orders were on the road a month and of course were a total loss, yet some customers accepted the order without having their agent make note of it and then sent their claim to me for their money back, or for their orders to be refilled. Of course I could collect nothing from the express company under the circumstances and such orders were worse than a total loss to me. I am pleased to say however that most of my customers were reasonable and treated me fairly; also that all that had proper notice taken of their damage and then sent their bills that the express company treated us fairly and paid their claims promptly.

TESTIMONIALS.

Gloucester Co., N. J., April 21st, 1920.

W. S. TODD,

Dear Sir: Will you kindly mail me another catalogue as I sent mine to a friend who wishes to order plants. My plants were very satisfactory and I have them all planted and am well pleased with them.

Yours truly,
FRED LANG.

Crawford Co., Pa., Jan. 22nd, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for plants. The plants received from you last year were fine and came in fine shape.

Yours truly,
J. H. SMOCK.

Washington Co., Pa., March 10th, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for plants. Mr. Ward a customer of yours recommended your plants to me.

Yours truly,
C. K. SHRIVER.

Summit Co., Ohio, April 8th, 1920.

W. S. TODD,

Dear Sir: My plants arrived today and out of three orders received your plants are the best; the Howard are exceptionally fine. If in need of plants next year you will get my order. Thanking you for such attention, I am,

Yours respectfully,
N. A. BUCKLIN.

Fulton Co., Ind., March 23rd, 1920.

W. S. TODD,

Dear Sir: Please send me your catalogue. I want some plants for myself and neighbors and you are highly recommended as having fine plants and true to name.

Yours truly,
JOHN KEEBLER.

Douglas Co., Kan., April 2nd, 1920.

W. S. TODD,

Dear Sir: Plants received in good time and splendid condition. Thanking you for such nice plants and the extras, I am,

Sincerely yours,
WM. BROWN.

Pittsburg, Pa., March 11th, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for plants. I am testing a great many varieties and have bought a large number of varieties in small quantities from many growers but the ones I have received from you are the most satisfactory.

Yours truly,
J. FRANK TILLEY.

Trumbull Co., Ohio, May 10th, 1920.

W. S. TODD,

Dear Sir: I received my plants in fine condition. Thanking you very much for prompt shipment, I am,

Yours truly,
H. C. PLATT.

TESTIMONIALS.

New London Co., Conn., March 15th, 1920.

W. S. TODD,

Dear Sir: I bought plants of you twice and want more this year. I sold my fruit farm five years ago and am now starting again and have been looking over my old records to tell me where to buy.

Yours truly, H. BURTON GILBERT.

Wyandotte Co., Kan., March 4th, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for Chester and Kellogg's Prize berry plants. I saw the berries that Mr. Brenner raised and they were the finest I ever saw.

Yours truly,
J. E. FREEMAN.

St. Louis Co., Mo., Feb. 16th, 1920.

W. S. TODD,

Dear Sir: I have heard so much about you and the fine plants that you have that I send you my order. I have taken it from a neighbors catalogue so please mail me one.

Yours truly,
J. J. DUNKER.

Wyandotte Co., Kan., March 8th, 1920.

W. S. TODD,

Dear Sir: One of your customers gave me your catalogue and as I am needing plants I am sending you my order; also one for a neighbor of mine.

Respectfully yours,
J. W. CRAFTON.

Wyandotte Co., Kan., Jan. 21st, 1920.

W. S. TODD,

Dear Sir: I saw some of the berries that Mr. Brenner raised from plants he bought of you so please send me Chester and Kellogg's Prize plants for the amount enclosed.

Yours very truly,
GEO. F. HURRELBRINK.

Saint Francois Co., Mo., Feb. 10th, 1920.

W. S. TODD,

Dear Sir: Mr. George Perrot recommended your plants to me so send me plants of the three varieties named in order.

Yours truly,
WM. GOEWERT.

Campbell Co., Ky., April 15th, 1920.

W. S. TODD,

Dear Sir: I am enclosing the money for the berry plants. I received them in fine shape and am very thankful for them.

Very truly yours, JOSEPH NELTNER.

Greehe Co., Mo., April 5th, 1920.

W. S. TODD,

Dear Sir: I received the plants in fine condition and thank you very much for the extra ones you sent me.

Yours truly,
H. C. BURGESS.

STRAWBERRY PLANTS

DESCRIPTION.

CHESTER.—A chance seedling found in a yard in Chester, Pa., and sent to Kent Co., Delaware, where it soon became the leading market variety. During the past four years I have sold large quantities of the plants in all parts of the country and have never received an unfavorable report of it and growers from all sections report that this and Kellogg's Prize are the best pair of their season they have ever fruited. I have grown it with Chesapeake, Mascot, Joe Johnson and others and it is much better than any of these varieties in yield, quality, and selling for better prices. I have fruited it for the past four years with all of the most popular varieties and I consider it one of the best perfect blooming varieties of its season that I

have ever fruited. I want all of my customers to give it a trial on any soil and I am sure it will please you. It is a splendid grower and the plants are large with tall, broad, healthy foliage. The fruit is large, color bright glossy red, red clear through, firm and not surpassed by any variety in produc-

tiveness or quality. The calyx is extra large, bright green and remains green after being picked which gives it a very showy appearance. I always grow a large supply of these plants but the demand is such that I have never had half enough to fill all of my orders for it. For this season I have a good supply that are grown on light soil and they are the largest and best rooted plants I have ever grown of it.

W. S. TODD,

Campbell Co., Ky., April 18th, 1920.

Dear Sir:—I received my plants April 16 and in good condition yet I did not think they would come with this strike on but I know the delay was no fault of yours.

Yours truly,

JOHN GUNKEL.

HOWARD No. 17.—I have fruited this three times and find it much like the Premier both in growth and fruit. The plants are of the largest size and heavy deep-rooted. The plants are in great demand in all sections and many are claiming it is the best of the early varieties. Last season I could not begin to supply all of my customers with it and the demand for this season is sure to be much greater. It makes a splendid plant-bed that is not surpassed by any variety in productiveness and the fruit is large, bright glossy red, firm and of fine quality. It originated in Massachusetts and has been grown at the Connecticut Agricultural College for several

years and in competition with hundreds of other varieties holds the title of the best variety ever grown there. Prof. Stevens says:—In my reports I have been urging the growing of the Howard strawberry. I know of no variety that comes anywhere near it for health and vigor of plant, for plant making and for yield of fruit. The introducer says:—It ripens among the earliest of the mid-season varieties. It is the earliest fancy variety I have ever grown. The first fruit to ripen is fully as large as the much vaunted

Chesapeake, fully as firm and the quality is fully as good. It will yield three times as much fruit as the Chesapeake and is on the job for a week before the Chesapeake begins to ripen, when berries bring the highest prices. In a field with the most popular and productive varieties it has out-classed them all.

KING'S WEALTHY.—A new variety introduced last season by Mr. Potter from Mich., and I secured my plants from him. The following description is from the introducer and as I have always found him to be reliable I am expecting this berry will prove as good as he claims. The people who saw this new berry certainly went wild over it. Late as Gandy, color of Warfield, large as Uncle Jim, yield equal to Dunlap. What more could you ask for? We have given it a thorough trial on several different kinds of soil and find it has done even better than we had reason to expect. This berry is exceptionally large, fine flavor, good dark color and firm. The plants are good size and produce large crops of fruit. It resembles Warfield in color, which makes it a fine canning berry. The extreme lateness makes it very profitable. As grown here the plants have made a splendid bed of very large, tall, healthy dark-green plants, and as fruited on young plants the fruit was very large, roundish conical, dark-red, firm and of fine flavor and I am expecting this will prove to be a valuable late market variety.

AROMA.—One of the best late mid-season to late varieties grown and is the only late variety that is largely planted in many sections. It is very productive of large, glossy, dark-red berries and is a good one to plant with late pistillate varieties.

FENDALL.—This variety is largely planted in many sections but does not do so well here as many varieties of its season. It is a good plant maker of deep-rooted plants with bright healthy foliage, and produces a good crop of large fruit of good flavor. Ripens through a long season and is said to have yielded over 16,000 quarts per acre.

BIG LATE.—This is one of the very best of the late pistillate varieties. It is a splendid grower anywhere and with such tall, large, broad foliage that anyone can easily tell it from any other variety. The plants each season are loaded with large, beautiful bright red berries of the finest flavor and are firm and good shippers. We have nothing but good reports of it from all sections and customers will make no mistake in planting it. The originator says:—It is a strong, vigorous-growing plant with large leaves and it roots very deeply. The berries are produced in clusters on long fruiting stalks. The color of the berries is a deep scarlet, seeds bright yellow, calyx bright green, and the fruit stems are large, making a combination which attracts the attention of the buyer, no matter how many other berries are offered in competition.

HAVERLAND.—Introduced many years ago it is still one of the reliable commercial varieties and largely planted in almost all sections and seems adapted to all soils. Immensely productive and the fruit is large, long, conical, bright glossy crimson and of fair quality and firmness.

Washington Co., R. I., May 10th, 1920.

W. S. TODD,

Dear Sir: The plants arrived promptly and in excellent condition. The plants have splendid roots.

Yours truly,

R. W. GILBERT.

St. Louis Co., Mo., April 26th, 1920.

W. S. TODD,

Dear Sir: I received the lost box of plants this morning and you need not return my money. I am sorry the strike has caused us all so much trouble and hope my letter will not cause any hard feeling but after waiting so long and losing so much time going to the express office I got angry but you are not to blame for it. With best regards, I am,

Yours truly,

HARRY DECKER, SR.

LUPTON.—A fancy late variety that is here to stay and one of the very best perfect blooming varieties of its season that I have ever fruited. I find it superior to Chesapeake or Joe Johnson in many ways and have planted it in place of these varieties. The plants are good growers, perfectly healthy, deep-rooted with tall foliage. The fruit is of the largest size, bright red, firm and of good quality. The fruit sold here last season for 35 to 40 cents per quart wholesale and reports from customers in all sections was

LUPTON.

equally as good. One large grower in Maryland after seeing the fruit sold at his station last season phoned his order for 100,000 plants for this spring at any reasonable price. Last season I had a very large supply of the plants but could have sold twice as many. I have a nice lot for this year but do not wait too long in placing your order. The originator says:—If it has a fault no man has shown it to me. Its season is about five days ahead of the Gandy, from which it is a seedling, and lasts nearly as long. It makes lots of plants and should be set a good distance apart. I have grown all of the leading varieties by the Lupton but have never found one that would produce with it. It sells for the highest market prices and is especially recommended by commission merchants for long distance shipment on account of its firmness and good keeping qualities.

Mahoning Co., Ohio, April 1st, 1920.

W. S. TODD,

Dear Sir: I want to say that we have been buying plants from you for several years and that they have been very satisfactory. Last year I placed my order late and could not get your plants and had to secure them from another place and the plants were so poor that they did us no good at all. You already have my order to be sent to W. Va. and the order I am enclosing is for my garden here. I appreciate the good service you have given us.

Very sincerely yours,

(Rev.) J. M. SHAFER.

✓ **GIBSON.**—One of the best growers of large healthy plants and is a favorite with large commercial growers in almost all sections. The fruit is of large size and the plants are simply loaded with the berries. You will hardly understand how the plants will produce such quantities of fruit. The flavor is fine and the fruit is firm and a good shipper. The fruit-stems are strong and upright which keeps the fruit from the ground where it is easy to pick. I have a good supply of Gibson plants that I am sure will please you.

KELLOGG'S PRIZE.—This is certainly a wonderful late pistillate variety, one of the best ever sent out and is a success anywhere and on any soil. I have never had an unfavorable report of it and the demand for the plants is greater every season. The plants are large and splendid plant makers with tall, healthy glossy green foliage that is easily told from other varieties. All of the plants are simply loaded with berries of the largest

size, in fact you would wonder how any plants could produce such loads of large, highly-colored berries with golden seeds, the rich color extending to the center. Flavor simply delicious; firm and a good shipper. This berry continues in bearing until all of the late varieties are gone. If you have never grown this give it a trial; if you have grown it plant some more for you can't get too many berries of a variety like this.

W. S. TODD.

Dear Sir: Please send me your new catalogue as soon as you can as I want a lot of your plants this season. I must say the 8000 plants I got from you last season are as pretty as a picture and did much better than our home-grown plants. I must thank you for the extra plants you sent and the new varieties.

Campbell Co., Ky., Dec. 15th, 1920.

Respectfully yours,

WM. H. GOETZ.

CHIPMAN.—The plants are good growers, large and healthy with broad, bright green foliage and make good plant beds on any soil. It has perfect blossoms and is a good pollinizer for pistillate varieties. The fruit is large, and ripens a few days earlier than Bubach; color dark-red and of the finest flavor.

REWASTICO.—We have so many better varieties of its season that my supply of this for this season is very small and I shall discard it after this season unless there is more demand for the plants. The plants I have are very nice and if you care for them I will be pleased to fill your order.

Salem Co., N. J., April 16th, 1920.

W. S. TODD,

Dear Sir: We received our plants and have quite a lot of them planted. They are very nice and cleaned and packed to perfection; so bright and fresh they look as if just taken from the ground. I shall have to recommend you to anyone wanting plants. I received a small shipment from the leading nursery in the middle west last week and they looked like a bundle of alfalfa hay; if their plants was worth \$9.00 per 1000 yours are easily worth \$20.00. Thanks for the interest you have taken in my order. If you are in this section any time be sure to call on me.

Yours respectfully, CHAS. C. HOLLADAY.

DR. BURRILL.—A great plant maker that will make a good growth on any soil and under any conditions. It is very productive, fruit is medium to large, dark-red, firm and of good quality. I have fruited this three times and if there is any difference in the fruit of it and the Dunlap it will take more of an expert than myself to discover the difference and I have reports from many growers that are of the same opinion. I secured my plants direct from the introducer, who says:—Dr. Burrill is a scientific cross of the Sen-

ator Dunlap and Crescent. All of the splendid qualities of these two famous varieties are embodied in this one variety. In plant growth it is a marvel. Its long and heavy root system makes it a perfect drouth resister. In production of fruit it surpasses either of its parents. The berries are large and beautifully formed. The surface of the berry is a deep glossy red. The meat is solid and rich. In flavor it is milder and more delicious than Dunlap. The calyx is a bright green, and the seeds are yellow, making a beautiful color combination. It is a strong bisexual and has a very long blooming season, making it unequalled for a pollenizer for pistillate varieties.

PARSON BEAUTY.—One that may be depended upon to produce a large crop of fruit every time. The plants are splendid growers on any soil and without a spot of any disease. The fruit is large, uniform shape, dark red, colors all over at once and is of fair quality. It is well-known to all commercial growers and largely planted on account of its vigor and productiveness.

Warrick Co., Ind., Feb. 13th, 1920.

W. S. TODD,

Dear Sir: You have been recommended very highly to us as producing the very best strawberry plants; please mail me your catalogue as I want several thousand plants.

Very respectfully,

G. H. HARRISON.

FORD.—A chance seedling found in Maryland and introduced six years ago. I have fruited it three times and each season it has produced a large crop of fancy fruit, large, firm and of good quality. It is a splendid grower and makes fine beds on any soil and I do not think anyone will be disappointed in growing it for family use or market. It has been tested in all parts of the country and the demand for the plants is greater each season. The introducer says:—If there was any variety at our station that outriv-

aled the Joe Johnson it was the Ford. In season the Ford is the same as Joe Johnson, in size it ranks about the same; is a deeper red in color and has a firmer texture, making it a firmer berry. Meat is solid red clear through with a flavor similar to Wm. Belt. The New York Experiment Station says of the Ford:—Plants numerous, extremely vigorous, healthy, very productive; flowers semi-perfect to perfect, bloom very late, fruit-stalks very long, thick, erect, branching into many long pedicels; calyx unusually large, attractive green. Fruit matures very late; of largest size; flesh red throut, unusually juicy, firm, mild, sweet; of good quality. One of the best of the late varieties.

CHIPPEWA.—An early variety received from H. J. Schild of Mich. This is a good grower and the plants are of the largest size and very deep-rooted. As fruited here last season it was very productive of large, beautiful dark glossy red fruit, and the flavor delicious. I am sorry that I have but few plants of this to offer this season for the fruit is a treat for either the home garden or commercial market.

New Castle Co., Del. Feb. 9th, 1920.

W. S. TODD,

Dear Sir: I am enclosing my order for Lupton and Howard plants. I fruited your Chester plants last season and they did fine here.

Yours truly,

JAMES J. WEBB.

PAUL JONES.—One of the best pistillate varieties ever introduced that succeeds almost everywhere and if in doubt as to what to plant you will make no mistake in selecting it. Since introducing it I have sold more of

the plants than of any other variety and have never received but one complaint. It is largely planted in the central states and I have sold nearly three millions of the plants in Kansas where it is their favorite variety. It is one of the most productive varieties ever introduced on any soil, and the fruit is of the largest size and holds its size to the very last picking; it is firm and of fine quality. My Paul Jones for this season are the largest I have ever grown.

PREMIER.—An early variety that was in such demand last season that growers were willing to pay almost any price and then could not be supplied. Ripens with the earliest, is very productive, fruit large, red to the center and of delicious flavor; firm, a good keeper and sells for fancy prices.

The plants are of the largest size and very deep-rooted and makes a splendid fruiting bed. I have a good supply of them but the demand is such that there is sure not to be enough to supply all that want them, so send your order early and do not be disappointed.

MAGIC GEM.—A late mid-season variety. The fruit is large and firm and sells for fancy prices. I sold out of this last season and did not have as many as I wanted for my own planting, so can only offer it in a small way this season.

SAMPLE.—One of the best mid-season to late varieties grown and largely planted by commercial growers in all sections. One of the varieties that is always in demand and for this season I have a large supply of extra fine plants. It is noted for its immense productiveness and large fruit. The plants are large, heavy-rooted vigorous growers with dark-green foliage. The fruit is large, roundish conical, dark red, colors all over at once and is firm enough for distant shipment.

GLEN MARY.—Does not succeed in all sections, principally in the south; it is a fancy variety where it does succeed and is named by many large commercial growers as one of the best varieties ever introduced. The plants are of the largest size with tall, coarse dark-green foliage and deep-rooted. The fruit is very large, dark-red, firm and of fair quality. Place your order early for Glen Mary plants.

SENATOR DUNLAP.—This is largely planted and one of the best standard varieties in many sections. The plants will grow anywhere and with any kind of treatment. It is very productive and usually matures every berry and they are of medium size, bright glossy red, a good shipper and of good quality. It will produce fine berries in thickly matted rows but if fruit of the largest size is wanted it should be kept thinned or set a good distance apart as it is apt to make too many plants for best results. My Dunlap plants for this season are extra large and heavy-rooted.

GANDY.—The standard late variety. For best results must be planted in black swamp or rich stiff soil. It is one of the best shippers and always sells for fancy prices. By planting another late variety with perfect blossoms with it you will get better berries and a much larger yield.

SUPERIOR.—One of the most popular varieties ever grown on this peninsula and succeeds almost everywhere. It is a vigorous grower on any soil. It sets an immense amount of fruit and if planted on rich soil or is well fertilized it will not be surpassed by any variety in productiveness. The fruit is medium to large, bright glossy red and is so firm that it will ship and carry well to any market. It ripens early and continues in bearing until the late mid-season varieties are gone. Canning and preserving factories will always buy Superior in preference to any other varieties.

WM. BELT.—Whenever quality and large size is considered Wm. Belt ranks with the best. It is a popular fancy variety and always brings fancy prices. It is quite productive, fruit roundish conical and the color a beautiful bright glossy red. It rusts in some sections but where it succeeds is a favorite and is largely planted by many growers.

BUBACH.—This favorite among the old standards is so well-known that it needs no description. My supply of this for this season is small but of the finest quality and I advise all that want the plants to order early.

O. I. C. (Ekey).—This is a good second early variety and is a favorite in many sections. It is very productive, fruit large, dark-red, firm, of good quality and always sells well. It makes a good plant growth on either high or low land.

Cape Girardeau Co., Mo., March 26th, 1920.

W. S. TODD.

Dear Sir: I am glad to come to you again for plants and as usual I am sending for quite a variety. Am also glad to know that you have a good supply of plants and can dispose of them and hope it will bring you a big share of prosperity and thus reward you for the chance you have been giving your customers to buy good plants at very moderate prices. With best wishes, I am,

Truly yours,

L. R. JOHNSON.

The Everbearing Varieties

PROGRESSIVE.—For all sections, especially the South, this is the best variety. The plants are of good size, deep-rooted and good growers. The fruit is of medium size, dark red and of good quality. It produces plenty of fruit on both the old and young plants all the summer and fall and is the first variety to ripen here in the summer.

PEERLESS.—The best plant maker of any of the everbearers I have yet tested. The plants are of medium size with healthy, dark green foliage. It produces as much fruit as most of the standard varieties and it is large, firm, dark-red and of good quality. Some of the old plants will bear fruit the first season but many of them do not and while I have always mentioned this in my catalogue customers write every season that they do not think they have the genuine Peerless on this account.

KOSATO.—One of the "Indian Strain" of everbearers introduced by H. J. Schild, Ionia, Mich. It makes a good growth of large healthy plants. It also produces large quantities of fruit on both the young and old plants the first season and I have found it the best everbearer I have ever fruited. Last season I was sold out of these plants before I was aware of it and did not have as many as I wanted left to set myself, so my supply is small this season and I can only spare a small part of them; if you care for this variety which I am sure would please you I would advise you to send direct to the originator, who can probably supply you.

TESTIMONIALS.

Portage Co., Ohio, March 12th, 1920.

W. S. TODD,

Dear Sir: I am enclosing our order for plants, also one for my neighbor, J. R. Milburn. Thanking you for your square dealing with us in the past, and wishing you much success, I am,

Respectfully yours,
E. L. RICKETTS.

Belmont Co., Ohio, April 26th, 1920.

W. S. TODD,

Dear Sir: The shipment of plants arrived today in very fine shape, just right as far as I can see. I thank you very much for the extra bunches that you sent; you always give me a happy surprise along this line.

Yours truly,
A. J. LIVEZEY.

Henry Co., Iowa, April 15th, 1920.

W. S. TODD,

Dear Sir: Strawberry plants came to hand in good condition. Thanks for extras. Enclosed you will find an order for Chester plants which please send to the following name.

Yours truly,
H. A. GEESEHA.

Salem Co., N. J., March 25th, 1920.

W. S. TODD,

Dear Sir: Your letter received. I am sorry you do not think you can fill my order for the variety named. I would like to have some plants of it and if you will only send me some of your cull plants I will be perfectly satisfied.

Respectfully yours,
C. C. WILLIAMS.

Washington Co., Pa., April 12th, 1920.

W. S. TODD,

Dear Sir: Enclosed find order for 3100 plants. Mr. Bartlett Johnson one of your customers advised me to send my order to you.

Yours truly,
CHAS. C. CONDIT.

York Co., Pa., Feb. 1st, 1920.

W. S. TODD,

Dear Sir: I wish to say that I fruited the Lupton and Big Late last year that you sent me and I am more than pleased with them as you will see by the order I am enclosing. I shall plant three acres of them this spring. There has not been a berry in the York and Harrisburg market like the Lupton. The sight of these big luscious berries drew the people in crowds around our stands. Wishing you a prosperous season, I remain,

Very truly yours,
CLAYTON F. WEAVER.

Wyandotte Co., Kan., Jan. 23rd, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for 2000 each of Chester, Big Late and Kellogg's Prize. Can highly recommend the Big Late; sold them in the market here last season and was asked if we sold them by the dozen and if we polished them before taking to market. You are so well-known in this neighborhood that I can't think of any new names to send this time.

Respectfully,
FRANK O. ORUP.

TESTIMONIALS.

Sedgwick Co., Kan., April 26th, 1920.

W. S. TODD,

Dear Sir: Received the plants in fine condition. I do not worry any more about plants since I get them from you as I am sure I will get the best that grows and put up in the very best possible condition. I am getting to be an old customer as this is the eleventh straight year I have got my plants from you. My neighbors that sent you their orders are all pleased with the plants sent them. They saw the berries I grew last year from your plants and they were fine and sold for \$5.00 per crate of 24 pints when others sold for \$6.00 per crate of 24 quarts. Thanking you for your square dealing and extra plants, I am as ever,

Yours truly, E. H. COOLEY.

Lycoming Co., Pa., May 7th, 1920.

W. S. TODD,

Dear Sir: I received my plants in time and in fine shape. I am enclosing the amount due for postage.

Respectfully yours,
H. S. McCLURE.

Cape Girardeau Co., Mo., April 26th, 1920.

W. S. TODD,

Dear Sir: Plants arrived today, making 17 days on the road. Am delighted to say that they were still in good condition, thanks to your good packing, practically no loss. With many thanks for your trouble and liberal count, I remain,

Yours very truly,
L. R. JOHNSON.

Wyandotte Co., Kansas, April 19th, 1920.

W. S. TODD,

Dear Sir: I received the plants and have them all planted and they were all in fine shape.

Respectfully yours,
MARTIN DECHMAN.

Ulster Co., N. Y., May 17th, 1920.

W. S. TODD,

Dear Sir: Enclosed find check for amount due on plants. I thank you very much for the extra Howard plants.

Yours truly,
J. W. ENDERLY.

Sedgwick Co., Kan., Feb. 23rd, 1920.

W. S. TODD,

Dear Sir: I am sending you my order for plants as they are recommended very highly to me by Mr. E. H. Cooley,

Yours truly, O. H. STEVENS.

New London Co., May 3rd, 1920.

W. S. TODD,

Dear Sir: My plants have arrived all right and were a nice lot, well-packed and arrived in the best of condition. I thank you for the extra plants and generous count. Your plants will keep in the packages a long time the way you pack them. Wishing you a successful season, I am,

Yours very truly,
T. T. WHIPPLE.

TESTIMONIALS.

Pickaway Co., Ohio, May 20th, 1920.

W. S. TODD,

Dear Sir: I received the plants in fine shape and thank you for your prompt attention to my late order.

Yours truly,
S. F. NORMAN.

Washington Co., Pa., April 15th, 1920.

W. S. TODD,

Dear Sir: I am enclosing my order for plants, also one for Mr. Allen. Two years ago my cousin was at your place and got several thousand plants and he was well pleased with them.

Yours truly,
IRA A. CLEAVER.

Camden Co., N. J., April 19th, 1920.

W. S. TODD,

Dear Sir: I received all of my plants in fine condition and am much pleased with your treatment. Thanking you for fixing us up so nicely with the Howard and Lupton plants, I remain,

Yours truly,
HOWARD F. DeCOU.

St. Louis Co., Mo., April 6th, 1920.

W. S. TODD,

Dear Sir: This is just to let you know we received our plants in fine condition and to thank you for the three extra bundles.

Yours truly, FRED J. MOEHNER.

Marion Co., Ind., April 24th, 1920.

W. S. TODD,

Dear Sir: I received the lost plants today; they were still in good condition and I am well pleased with them.

Yours truly,
C. W. STANFIELD.

Rockingham Co., Va., April 29th, 1920.

W. S. TODD,

Dear Sir: I received the plants in splendid condition. They have started to grow nicely and look very fine.

Yours truly, M. O. DEPUTY.

Accomac Co., Va., April 7th, 1920.

W. S. TODD,

Dear Sir: Received the plants in fine shape. Enclosed find check for them. Thanking you, I am,

Very truly yours,
S. W. MATHEWS.

Fulton Co., Ind., March 23rd, 1920.

W. S. TODD,

Dear Sir: Please send me your catalogue. I want some plants for myself and neighbors and you are highly recommended as having fine plants and true to name.

Yours truly,
JOHN KEEBLER.

TESTIMONIALS.

Wyandotte Co., Kan., Feb. 2nd, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order and also one for a neighbor. The plants we received from you last year have attracted the attention of passers by to enquire what plants they are and from whom we purchased them much to our delight as we kept them in excellent condition.

Respectfully yours, E. A. PITTS.

Westmoreland Co., Pa., Feb. 25th, 1920.

W. S. TODD,

Dear Sir: Enclosed find my order for four varieties of plants. We had a nice crop of fruit last year from your plants; they were Paul Jones and Wm. Belt and I am pleased with them.

Yours truly,
HOWARD J. WEAVER.

Tioga Co., Pa., May 8th, 1920.

W. S. TODD,

Dear Sir: The plants I ordered from you came in fine condition. I have been growing strawberries for a number of years and have had plants from various growers but have never had better or a more sturdy lot of plants than the ones received from you. I am more than pleased with them. Thanking you for your promptness and courteous treatment, I am,

Very truly,

CHARLES L. PRESTON.

Washington Co., R. I., April 21st, 1920.

W. S. TODD,

Dear Sir: Enclosed find amount due for postage on plants. I thank you very much for your prompt shipment of plants which arrived in good condition.

Yours truly,

HENRY A. CONGDON.

New London, Conn., Jan. 22nd, 1920.

W. S. TODD,

Dear Sir: I am enclosing my order for plants. Last year I was late and could not get your plants so I am ordering early this time. I have used your plants for several years and have always found them first-class and true to name in every case.

Yours truly,

E. E. DAVIS.

Washington Co., Pa., April 19th, 1920.

W. S. TODD,

Dear Sir: I received my plants and they came in excellent condition, and are certainly fine plants. I thank you for the new variety sent and also for the extra Gibsons. Wishing you success, I remain,

Sincerely yours,

JOHN H. WARD.

Portage Co., Ohio, May 1st, 1920.

W. S. TODD,

Dear Sir: We received the plants and they are certainly fine, could not be better.

Yours respectfully,

E. L. RICKETS.

IMPORTANT

Please read every word on this page before ordering plants.

THE DESCRIPTION of the different varieties is as they have done with me at fruiting time. Varieties that I have not fruited I have given originators description, or others, that I consider best authority. Varieties marked Imp., have pistillate blossoms and to fruit them must be planted near some variety with perfect blossoms, marked Per.

I WILL sell 6 of a kind at the 12 rate, 50 at 100 rate and 500 at 1000 rate. In ordering 12 to go by express you may deduct 5 cents per 12 from prices quoted.

TERMS:—Payment must be made before shipment of plants. If not convenient to remit entire amount when order is sent remit not less than one-fourth of the amount of the order and your order will be booked and held for you and you can remit the remainedr when convenient, before shipment of plants.

PLEASE remit by P. O. Money Order on Greenwood, Express order, Registered Letter, Check or Bank Draft.

I GUARANTEE the safe arrival of plants and in good condition if sent by mail or express by May 1st.

I TAKE the greatest care to have all plants true to name and seldom ever have a complaint, but should any prove otherwise than represented I will not be responsible for any amount greater than actually paid me for the plants.

CLAIMS, if any, must be made on receipt of plants when they will be carefully examined, and if just, made satisfactory.

PACKING is done in the best manner possible. All plants are cleaned, tied in bunches of fifty, (except late in the season we sometimes tie in bunches of twenty-five), labeled, and packed in light crates for which I make no charge. Written notice is sent each customer on receipt of order and one when order is shipped.

EXPRESS RATES.—All plants sent by express go twenty per cent cheaper than other goods.

IN ORDERING be sure to write your name and address plainly, give Post Office, County and State, and do this every time you write. Be sure to say how plants are to be sent, by mail or express. All too heavy to mail should be sent by express, as freight is slow and not safe for perishable except for a short distance or early in the season.

I SHIP PLANTS to Southern customers during mild weather any time after they receive this catalogue, and to the North as late as the 15th of May, but for all sections it is advisable to order early, and name date of shipment as early as you can use the plants. Plants shipped early have less foliage, can be packed lighter, and if planted early almost always do well.

IF YOU RECEIVE more than one catalogue please hand one to your neighbor fruit grower.

SUBSTITUTION. Early in the season I have everything listed in this catalogue but late in the season usually sell out of some varieties. In case I am out of varieties ordered please say if I shall substitute some variety of same season, suitable for your locality. I always notify the customer if I have time to receive your answer before you wish plants shipped but in case you do not request me to substitute I shall return the amount for the plants I do not have.

**I GROW EVERY PLANT I SELL AND THEY ARE FRESH DUG
AT THE TIME OF SHIPMENT.**

In digging plants the entire row is taken up and for this purpose forks are used, as they in no way injure the plants and all the roots are secured. As fast as they are dug they are placed in heavy sacks, labeled, carried to the packing house, where they are thoroughly cleaned (all plants too small to be called first-class are thrown out), tied in bundles, labeled, and orders are made up, packed in light ventilated crates, with plenty of damp moss, a card with certificate of inspection, purchaser's name and address, county and state, is placed on the crate, and is ready for shipment; all this work is done in a closed building; the plants have not been exposed to the sun and wind a minute and will reach their destination in *perfect condition, fresh and green, and ready to grow.*

When ordering, please send the names of fruit growers, and for your trouble we will send you plants of some new variety for testing.

THE QUALITY OF STRAWBERRY PLANTS.

In looking through the many catalogues you receive you will notice that many claim to be the largest growers of plants, and that their plants are the best grown. I do not claim to be the largest grower of plants or that they are better than some others, but I have bought plants from some that make such claims in different parts of the country and I have never received any better than I send out; in some cases I have had to throw away half of the plants as they had the crowns broken out or were so small that they were not worth planting. I *GUARANTEE* the plants I send out to be as large and as fine as you can get anywhere (no matter what you pay), and to be put up in as good condition and if grown side by side, under like conditions, that they will produce as much and as good fruit.

If you have been buying plants elsewhere and have received good plants and treatment and are satisfied it is not likely that I may expect your order, but if you care to favor me with a share or all of your patronage I assure you that it will be a pleasure for me to serve you and that I feel sure I can please you.

**STATE OF DELAWARE
STATE BOARD OF AGRICULTURE
Certificate of Nursery Inspection**

Dover, Delaware, October 18, 1920.

To Whom It May Concern:

This certifies that I have this day examined the nursery stock and premises of the Nurseries, of W. S. TODD, at Greenwood, Sussex county, Delaware, and that said nursery stock is apparently free from crown gall, peach yellows, peach rosette, the San Jose scale, and all other plant diseases and insects of a seriously dangerous nature, that may be transferred on nursery stock.

This certificate may be revoked by the State Board of Agriculture for cause, and it is invalid after August 31, 1921, and does not include nursery stock not grown on the above named premises unless such stock is covered by certificate of a State or Government officer and accepted by the State Board of Agriculture.

WESLEY WEBB, Inspector.
